

AUS ACADEMIC PUBLICATION

2018.01.01 – 2020.04.10

CONFIDENTIAL

Issue: 2020.04.10

THIS PUBLICATION IS FOR INTERNAL CIRCULATION ONLY. NO PART OF THIS PUBLICATION MAY BE REPRODUCED WITHOUT PRIOR CONSENT OF THE OFFICE OF CHIEF RESEARCH OFFICER (OCRO) AT AUS.

Acknowledgements

- *Justina Cardozo for coordinating the entire process.*
- *Irise Villamora in charge of collecting, compiling, and presenting the data.*
- *Bo Yao in charge of collecting, compiling, and presenting the data.*

PREFACE

The American University of Sharjah (AUS) is transforming itself into an internationally recognized research-comprehensive university, while maintaining its tradition of excellence in offering an American-style liberal arts education. Research is woven into the fabric of education in the 21st century. Education, once focused on knowledge learning, has transformed into a means of knowledge discovery. The new knowledge has the potential to improve our lives, advance our communities, and profoundly benefit humanity and the environment. More importantly, the process of discovery continually allows researchers and scholars (whether students, faculty, scientists, or clinicians) to challenge themselves while making indelible contributions to the world.

A fundamental method for researchers and scholars to share the outcome of their research and scholarly work is through publication of their findings. These published works serve as documentation of researchers' and scholars' contributions to the knowledge base and participation in current advances and developments in their field of interest.

This booklet contains data samples of journal and book (including book chapters) publications authored by members of the AUS community. Data were obtained from databases of journals and books in the Web of Science Core Collection, which usually selects journals and books on the basis of well-defined criteria (e.g., peer review, citation, etc.). On the next page, we explain definitions of databases and other terminologies used in this booklet.

The information in this booklet, i.e., data samples of journal and book publications, is intended to be provided to AUS leadership for their reference. We note that journal and book publications are not the only outcomes of research and scholarly work. Different academic communities may have different ways to disseminate the knowledge discovered. Regarding journal and book publications, different academic communities may have different publication rates and different criteria for journal and book selections and evaluations. **As such, the data here are not intended to be used as the only means of evaluating performance of research and scholarly work.**

We thank Justina Cardozo, Irise Villamora and Bo Yao for their time and effort in assisting with producing this booklet. Please email Justina Cardozo (jcardozo@aus.edu) for any correction of the data included here. Once verified, corrections will be made in an updated version.

NOTES

A. Databases of Publications

The publication data contained in this booklet were collected from six databases in *Web of Science Core Collection (WSCC)*.

- ❖ The *Science Citation Index Expanded (SCIE)*, the *Social Sciences Citation Index (SSCI)* and the *Arts & Humanities Citation Index (AHCI)* are the traditional flagship Citation Indexes in WSCC. According to James Testa [1], these Citation Indexes cover the world's top tier international and regional journals whose evaluation and selection is governed by the WSCC Journal Selection Process, a well-established set of criteria that have been applied consistently for over fifty years.
- ❖ The *Emerging Sources Citation Index (ESCI)* is a new journal database in WSCC. ESCI covers all areas of the scholarly literature of the sciences, social sciences and arts & humanities. The selection process for ESCI is related to the process applied to SCIE, SSCI and AHCI. In many situations, journals in this database are migrated into databases SCIE, SSCI, and AHCI.
- ❖ *Book Citation Index – Science (BKCI-S)* and *Book Citation Index – Social Science, and Arts & Humanities (BKCI-SSH)* are two databases related to books (and book chapters) in WSCC. Their selection process is discussed in [2].
- ❖ The data collected from WSCC in this booklet is updated as of April 10, 2020.

B. Statistics of Publications

1. Absolute and Weight Numbers of the Authors

The publication statistics for colleges/school, departments, and individual authors are reported in terms of absolute and weighted numbers of publications. These statistics are calculated as follows:

For a publication item (e.g., a journal paper), each AUS co-author is assigned an *absolute* number and a *weighted* number to reflect his/her credits on the publication.

- ❖ The absolute number for a publication assigned to each AUS co-author is always 1.
- ❖ For the weighted numbers, in the earlier editions of this book (i.e., 2020-1-10 edition or earlier), we used an assignment method. However, beginning with the 2020-04-10 edition, we are now using a new method.
- ❖ The new weight assignment method is as follows: if a publication item has been published by n staff and m student co-authors of AUS, the *weighted* number for an AUS co-author is assigned as follows:
 - If $n \geq 1$, then, the *weighted* number of that publication assigned to each AUS staff co-author will be $1/n$, while the *weighted* number assigned to each AUS student co-author will be zero.
 - If $n = 0$, then, the weighted number of that publication assigned to each student co-author will be $1/m$.
 - Similarly, statistics of publication for departments, and colleges and school, and the University are derived.

Let us consider the following example of three papers. Let A, B, and C be AUS professors and X, Y, and Z be AUS students. By the new method used in this booklet, the absolute and weighted numbers of these 3 papers are assigned to each authors as follows:

| Papers and Co-Authors | m | n | Professors | | | | | | Students | | | | | |
|---|---|---|------------|------------|-------|------------|-------|------------|----------|------------|-------|------------|-------|------------|
| | | | A | | B | | C | | X | | Y | | Z | |
| | | | Abs # | Weighted # | Abs # | Weighted # | Abs # | Weighted # | Abs # | Weighted # | Abs # | Weighted # | Abs # | Weighted # |
| Paper 1 is coauthored by A, B, C | 3 | 0 | 1 | 0.33 | 1 | 0.33 | 1 | 0.33 | 0 | 0.00 | 0 | 0.00 | 0 | 0.00 |
| Paper 2 is coauthored by A, B, C, X, Y, Z | 3 | 3 | 1 | 0.33 | 1 | 0.33 | 1 | 0.33 | 1 | 0.00 | 1 | 0.00 | 1 | 0.00 |
| Paper 3 is coauthored by X, Y, Z | 0 | 3 | 0 | 0.00 | 0 | 0.00 | 0 | 0.00 | 1 | 0.33 | 1 | 0.33 | 1 | 0.33 |

2. The Figure of **Cumulative Weight Number**

In order to illustrate the distribution of publications over a given author population (say, the entire university or a college/school), from this edition of the booklet, we introduce the figures of cumulative weight number. These figures are generated as follows:

- ❖ For a given author population and a given time period, we rank the authors by their weight numbers. That is, the author with the highest *weight* number is ranked number 1, the author with the second highest weight number is ranked number 2, and so on.
- ❖ We then draw the figure of the cumulative weight number over the author population.

Generally speaking, this figure will always be convex. However, if all the authors contribute equally, then the figure will be a straight line. The more convex the figure is, the less even author contributions have been.

From these kinds of figures, one can easily observe how differently ranked authors contribute to the production of publications.

For example, let us consider the figure on Page 6. The author population for this figure is the entire AUS while the time period considered is from 2019.01.01 to 2019.12.31. From the figure, we can observe the following:

- ❖ A total of 222 authors from AUS produced 347 publications in this period of time.
- ❖ However, 48 top-ranked authors produced 50% (i.e., 173.50) publications reported while 118 top-ranked authors produced 80% (i.e., 277.6) publications.
- ❖ The remainder of the campus produced the remaining 20% of the publications (e.g., $347 - 277.6 = 69.4$).
